

# Melon Agua Fresca

Makes about 1 quart

**4 cups (packed) fresh melon (such as cantaloupe, honeydew melon, watermelon—peeled, and seeded, as appropriate)**

**1/2 cup water, plus more if necessary**

**1/4 cup sugar, plus more if desired**

**About 2 tablespoons lime juice, plus more if desired**

**Scoop the fruit** into a blender, then add the water, sugar and lime.

**Blend until smooth.** Add more water, if necessary, to achieve a light, easy-to-drink consistency.

**Taste and season** with more sugar and lime if you think necessary.

Refrigerate to chill or serve over ice.
